The Hine Nursery Company

Brandon, Manitoba

TO OUR FRIENDS AND CUSTOMERS

In presenting this, our catalog for 1932, we are pleased to be able to offer a much larger selection of high class material than in former years. It will be noted that we are listing the recent novelties separately, and that we have cut down considerably on descriptive matter and illustrations.

All stock offered has been tested by us for a number of years, and has proved quite hardy. The popularity of **Rock Gardens** is rapidly increasing and we now have a very complete stock of Rock Plants. Our stock of **Penstemons** and **Statice** is the largest in Western Canada and we recommend these for general planting, especially the Statice Small sprays of Statice Dumosa sold for 25c each last year and were in demand.

Every effort is made to have stock sent out true to name and it is freshly and carefully dug. We pack all stock, including trees, in moss (not straw) and waterproof paper, all mail shipments being enclosed in cardboard boxes.

Any order that does not come up to expectations may be returned and your money will be refunded. We supply these plants to leading **Government Institutions** and **Horticulturists** throughout the West, and the careful buyer can easily satisfy himself regarding the quality of stock we supply.

Our nursery is located about ten miles south of Brandon on the Highway. There is a good gravelled road leading right in, and we shall be glad to welcome visitors at any time.

Yours respectfully,

THE HINE NURSERY CO.

HARDY PERENNIAL PLANTS

Plants are sent postpaid at prices quoted

NOVELTIES AND VARIETIES OF EXCEPTIONAL MERIT

The following list contains only those sorts that have been **carefully tested** by us and can be **recommended with confidence**.

ANTHEMIS PERRY'S VARIETY

Golden yellow flowers three inches in diameter, from June until September. Fern-like foliage. A winner of many medals and awards in England recently. 12-18 inches. Each 60c.

AQUILEGIA NEW HYBRIDS

Gorgeous new art shades. Giant flowers. Far superior to any other strain. Each 25c.

Note—In some districts Columbines are being attacked by the Colorado Columbine Borer. Dividing the plants every spring with a sharp knife will nearly always prevent attacks, although when this is done they do not usually flower until August or September.

IRIS SIBERICA NEWTONE

Lovely Siberian Iris with purple buds opening to dark blue. Will grow in driest of soil. Very hardy. Flowers June and July, height 2 feet. Each 35c.

IRIS SUSAN BLISS

Strong tall growing German Iris with largest mauve pink flowers, scented. Very fine. Each 80c.

MEGASEA CORDIFOLIA HYBRIDS

Pink flowers in early spring, the large evergreen leaves make this a handsome plant for the rockery. Height 8-12 inches. Each 30c.

ORIENTAL POPPY, OLYMPIA HYBRIDS

Large flowers of pure Orange, usually somewhat crinkled petals, in great profusion. All our other named varieties were killed by the winter of 1930-31, but Olympia and Olympia Hybrids proved absolutely hardy. One of our introductions. Each 30c.

PENTSTEMON GRANDIFLORUM

The finest new perennial introduced in years. Large mauve tubular flowers in June and July on three foot stems. Each 35c.

PHLOX ADA BLACKJACK

Beautiful large trusses of pink flowers. Hardy under all conditions. A general favorite. Each **35c.**

SEDUM No. 51

Compact tufts resembling Kosters Blue Spruce. One of the best edging or rock plants introduced in years. 4-6 inches. Very scarce. Each **40c.**

SEDUM No. 6

Companion to above, flat light green leaves masses of yellow flowers turning to red. Very hardy. 4-6 inches. Each **30c.**

SCABIOSA ISAAC HOUSE STRAIN

Perennials with large mauve or lavender flowers, three inches across, on strong wiry stems, fine for cutting. Prefer well drained soil. Height 18-24 inches. Each **30c.**

STATICE ELEGANTISSIMA

Choice new variety with myriads of tiny blue flowers. Each **60c.**

STATICE DUMOSA (Siberica)

Introduced into Western Canada by us in 1929, this is destined to be immensely popular when better known. Large flat heads of **silvery pink**, fine for drying. Recommended. Each **35c.**

MIXED STATICE

It is not often that mixed Statice are offered, so this is a chance to obtain several new and unusual kinds. Six for \$1.00.

RUDBECKIA GOLDEN GLOBE

New. Large flowers of globular form, **far superior to Golden Glow.** Each **35c.**

GENERAL LIST OF HARDY PERENNIALS

Note—All plants which have rosettes of green leaves after the ground freezes in the fall should be covered with 4-6 inches of straw. Such plants include Sweet William, Pinks, Pansies, Strawberries, Pentstemons, Campanulas, Sedums, Alysum Saxatile, Chrysanthemum Leucanthemum and Maximum, Thyme, etc., Statice, Scabiosa, German Iris and Columbine may also receive some winter protection.

ACHILLEA (Yarrow)

Perry's White—Double white flowers from June until frost. Height 12-16 inches. Each **20c.**

ACONITUM (Monks Hood)

Napellus Hybrids—Hooded flowers in blue, purple, mauve or white, succeeding in shade or full sun. Height 3-5 feet. Each 15c.

Bicolor—Tall, blue and white flowers, very fine. Each 30c.

Sparks—Beautiful dark violet. Each 30c.

ALYSSUM (Gold Dust)

Silver Queen—Masses of pale yellow flowers in early summer. 8-12 inches. Each 15c.

ANEMONE (Windflower)

Sylvestris (Snowdrop Anemone)—Produces many large pure white scented flowers on 12 inch stems during May and June. Hardy and desirable. Each 25c.

AQUILEGIA (Columbine)

Rose Queen—Pale rose and cream. 2-3 feet. Each 20c.

California Hybrids—Yellow and pink flowers, many of them double. Each 20c.

Miss Prestons Variety—Various shades of mauve, blue, or blue and white. Dwarf and early. Each 20c.

Canadensis Hybrids—(New) Flowers somewhat smaller than the above varieties, but produced in large numbers for a long period. Each 25c.

CAMPANULA (Hardy Canterbury Bells)

Sarmatica.—Grey hairy foliage, pale blue bells. Height 1-2 feet. Each 20c.

Persicifolia Telham Beauty Seedlings—Large pale blue bells 1½ inches in diameter from June until August. A splendid border perennial. Each 35c.

Persicifolia Mixed—Large blue or white flowers. Each 20c.

Persicifolia Double—Giant double flowers in blue or white. Rare. Each 75c.

CENTUREA (Hardy Cornflower)

Dealbata—Large rose colored flowers all summer, useful as a cut flower. 18-24 inches. Each 20c.

DELPHINIUM (Perennial Larkspur)

Wrexham or Hollyhock Strain—1-year plants, 6 for \$1.00.

Kelways—Various shades of blue, mostly single. 6 for 90c.

Blackmore and Langdons—Single and double. Generally admitted to be the best strain in existence. 6 for \$1.25.

DIELYTRA (Bleeding Heart)

Spectabilis—The old fashioned favorite, somewhat scarce this year.
Each 40c.

DRACOCEPHALUM (Dragon Head)

New hardy border plants, growing about a foot high with tubular flowers.

Argunense—Blue, very hardy. Each 25c.

Ruyschiana—Blue. Each 15c.

Japonica—Blue, white throat. Each 25c.

Virginiana—(Obedient plant). Spikes of pink flowers, 1-2 feet, from July till September. Each 20c.

Alba—White form of above. Each 20c.

ERIGERON (Fleabane)

Speciosus Hybrids—Single mauve flowers somewhat resembling Pyrethrum, produced in abundance from June till August. Height 1-2 feet. Each 20c.

GAILLARDIA (Blanket Flower)

Portola Hybrids—One of the most perfect varieties grown. Flowers 2½ inches in diameter with characteristic markings of the species. 2-3 feet. Each 20c.

GYPSOPHILA (Baby's Breath)

Paniculata—The last few years have demonstrated the great value of this plant in dry locations and every garden should have some for winter drying. 6 for 80c.

HEMEROCALLIS (Day Lily)

Dumortieri—Large lily flowers of dark yellow in June and July on 1-foot stems. Easily grown. Each 20c.

GERMAN IRIS

Splendid selection of mixed colors. 6 all different for \$1.00.
If interested write for prices of expensive sorts.

INULA

Ensifolia—Dwarf rockery plants producing many yellow flowers resembling miniature sunflowers in midsummer. Each 25c.

LATHYRUS (Everlasting Pea)

Tuberosa—Perennial Sweet Pea with small pink scented flowers from July until September. Very hardy, somewhat inclined to spread. Each 25c.

LILIUM (Hardy Lilies)

Tigrinum—The well known Tiger Lily which is best displayed when grown in clumps of masses. Single and Double mixed. 6 for 90c.

Tigrinum Fl. Pl.—This double form is superior to the old single sorts. As a cut flower they serve many useful decorative purposes. Large bulbs. Each 25c.

Collection of 6 hardy Lilies—All different and in various shades of orange or red. Will give a succession of bloom from June till frost. In addition to the above kinds this collection is made up from the following Lilies: Elegans, Umbellatum, Leichtlinii Max. Tenuifolium, Elegans Bicolor, Davidii, etc. Our selection, 6 Assorted Lilies, for \$1.40.

MONARDY (Bergamot)

Didyma, Cambridge Scarlet—Dark green scented foliage and large heads of brilliant scarlet. Height 12-18 inches. Flowers August till frost. Each 30c.

ORIENTAL POPPY

Olympia—Double flowers of rich salmon orange with crinkled petals. About 2 weeks earlier than other sorts and very free flowering. Each 35c.

PAEONIES

The following can all be recommended for general planting, and can be relied on to bloom profusely.

Felix Crousse—Bright red, double. An old but still popular sort. Each 50c.

Alba Superba—Large cup shaped double blooms on strong stems. One of the best whites. Rare. Each \$1.00.

Linne—Tall, double dark pink, very good. Each 60c.

M. Jules Dessert—Very large double light pink. Each 75c.

Le Cigne—Very profuse flowering double white, delightfully sweet scented. Each \$5.50.

Solange—Winner of First Prize at last year's Provincial Paeony Show. This variety is recommended only for show purposes. Our stock is true to name. Each 60c.

PENTSTEMON (Beard Tongue)

Coral Gem—Dainty coral colored tubular flowers on 2-3 foot stems from June until frost. A favorite with our visitors. Each 25c.

HARDY PHLOX

The varieties listed below have proved very hardy and reliable.

Miss Lingard—Large panicles of white, sweetly scented. Each 25c.

Pyramid—White, flowering later than the above. Each 20c.

Subulata—Spring flowering rockery or border variety with lilac flowers. Height 6-10 inches. Each 20c.

PHYSALIS

Francheti—Bright orange fruits resembling Chinese Lanterns, which make splendid house decorations for winter, when dried. The plants have a habit of coming up a foot or so from the place where they were the year before, so care should be taken that they are not hoed or dug up in early spring. Each 25c.

PYRETHRUM (Painted Daisy)

Roseum Hybrids—Mixed colors, most useful for cutting. Each 20c.

SEDUM (Stonecrop)

Dwarf flower plants indispensable for Rockeries.

Kamtschaticum—Bright green trailing foliage, yellow flowers. Each 15c.

Spectabile—Upright growing form, large fleshy leaves, heads of rose flowers. Each 25c.

Acre (Golden Moss)—Mossy creeping foliage, yellow star shaped flowers. Each 15c.

Spurium Coccinum—Fall flowering, bright rose, fine. Each 25c.

Sedum Kamtschaticum Variegata—Variegated trailing species with orange flowers. Each 30c.

Sedum No. 61—Upright form somewhat after the style of Spectabile. Bunches of small cream colored flowers. Each 25c.

Spirea Filipendula—Distinctive fern-like foliage, large loose panicles of cream colored flowers. A splendid rockery plant. Each 25c.

We have many other varieties.

THYMUS (Thyme)

Serpyllum Carneus—Dense mats of bright foliage, myriads of tiny pink flowers. July and August. Each 15c.

TRADESCANTIA

Bractiata—Desirable perennials growing 6 to 10 inches high and flowering from June until frost. Bright purple Anemone shaped flowers about an inch across. Each 20c.

Bractiata Coerulea—Similar to the above but bright blue. Recommended. Each 35c.

VIOLAS

Selected Hybrids—Immense quantities of bright purple flowers all summer. Fine for Rockery and the hardiest variety grown. Each 25c.

For other varieties see our 1931 catalog.

VERONICA

Spicata Alba—Introduced by us 3 years ago, this dwarf form has proved to be a popular rock plant. Each 25c.

CHOICE NEW HOUSE PLANTS

Plants are sent out of pots postpaid at prices quoted

AMYRILLIS (Everblooming Equestris Hybrids)

A wonderful range of colors, from pink to copper salmon and scarlet. The large flowers are produced in clusters on heavy stems. Flowers several times a year, and should be kept growing and not rested. By far the most satisfactory variety. Plants that will start to bloom this summer. Each 60c.

NEW GERANIUM "Michells Sensation"

Double, of the clearest possible shade of scarlet, the most continuous in bloom, it is now considered the best red there is. Each 35c.

NEW PELARGONIUM "Edith North"

A remarkably robust variety, with large trusses of deep pink flowers, each about 2 inches across. When in bloom it resembles an Azalea plant. Each 35c.

PRIMULA OBCONICA "Fasbender"

Excellent novelty with giant dark crimson flowers, which grow in large clusters just above the foliage. Each 35c.

COLEUS (Fancy or Show Varieties)

We have in stock a few plants of named Coleus which are far superior to the ordinary run of Coleus, which we offer for spring delivery at 35c each.

HOUSE PLANTS

FERNS

Whitmanni or Boston, Each 30c.

PRIMULA

Obconica. Each 25c.

VINCA

Variegated—For window boxes. Each 15c.

GERANIUM

Pink or Red, for bedding. Each 15c.

BEGONIAS

Dwarf everblooming varieties for window boxes or pots. Red, pink or white. Each 20c.

CHRYSANTHEMUMS

The small flowered varieties are usually considered most satisfactory. We have them in several different colors at 15c each.

We can supply many other plants suitable for House or Conservatory culture at reasonable prices.

CHOICE ANNUALS

PETUNIAS

The Petunia has always been a specialty with us, and our customers have been consistent prize winners at Western Flower Shows.

Scarlet—Plants growing about 2 feet high with many large brilliant scarlet blooms, wonderful for bedding. Dozen 50c.

Crimson and Black—Slightly ruffled, large. Dozen 40c.

Double Large Flowering Mixed—Will show about 50% doubles. Dozen for 50c.

Fringed, Double Dwarf—About 50% doubles, large fringed flowers in mixed colors. Dozen 50c.

Dieners Ruffled Monsters—Usually about 40% of these come fully double, mostly pink shades. Dozen 50c.

Mixture of all the above sorts. Dozen 45c.

SNAPDRAGONS

Giant Flowering Mixed—This year's novelty, fine. Dozen 40c.

Copper Red—Medium height. Giant flowers. Dozen 40c.

PANSIES

New Giant 1932—These are even better than the strain we sent out last year, which were first prize winners at the Brandon Horticultural Society's show. There is a splendid range of colors, and the flowers are all very large. We always send out small vigorous greenhouse grown plants, which have proved much more satisfactory than plants which have wintered out of doors. Per dozen 60c.

NASTURTIUM

Golden Gleam—Large Double flowers of golden yellow, which are 2 to 3 inches across. They are borne on erect stems 6 inches in length, and stand well above the foliage; splendid for cutting, as they are very sweetly scented. Per packet 30c.

VEGETABLE ROOTS

ASPARAGUS

Mary Washington—Grown from best Northern strain of this superior variety. Dozen 50c.

RHUBARB

Macdonald—This worthy introduction is fast replacing the old sorts. It is very vigorous, producing deep red stalks which are very tender and sweet, and have a most delicious flavor when cooked. Strong roots. Each 50c.

CLIMBING VINES

CLEMATIS

Tangutica—As these are not subject to hoppers, they are fast replacing the virginia creeper. Large bright yellow bell shaped flowers produced in abundance in midsummer. Grows about 8 feet high and is very hardy. Each 35c.

Ligusticifolia—A rapid grower with masses of small white flowers, followed by large clusters of silky seeds. Each 30c.

TREES AND SHRUBS

By mail or express at purchasers Expense

NATIVE BASSWOOD

A rather rare native tree with very large leaves, and producing small yellow flowers in early summer. A splendid tree for private or public grounds, it is quite hardy and easy to grow. 2-3 feet. Each 40c.

NATIVE BIRCH

Fast growing hardwood, which is well known and is being used to replace the Cottonwood and Manitoba Maple as an ornamental tree. The white bark makes them a distinctive part of any planting. 2-3 feet, each 30c. Per 100, \$18.00. 4-6 feet, each 50c.

CARAGANA

Caragana Pygmaea—Growing about 2½ feet high, it becomes covered with masses of bright yellow flowers in early summer. One of the hardest and best dwarf shrubs. Each 50c.

Halimodendron Argentium—Really a pink flowered Caragana with silvery leaves. This is a comparatively new shrub which is very hardy and is always admired. Each 50c.

Standard Shaped Caragana—Straight stems about 4 feet high with bushy tops. These are to be kept trimmed for lawn specimens. Each 75c. We can supply hedging Caragana at \$1.00, \$3.00, and \$5.00 per hundred.

TARTARIAN HONEYSUCKLE

The plants we offer were grown from the seed of a very dark red specimen, and are mostly very dark pink or red shades. Bushes, 2-3 feet. Each 40c.

GINNALA OR TARTARIAN MAPLE

A large shrub or small tree of great beauty. The leaves are dark green turning to pleasing shades in the autumn. We can supply these in either tree or bush form. 5 to 7 feet high. Each 75c.

LILACS

Grafted Lilacs—We can supply almost any named variety required. Below are listed a few of the older sorts.

Madam Abel Carriere

Pres. Carnot

Chas. Joly—Double Reddish Purple.

Frau Damman—White.

Pres. Grevy—Double Blue.

La Tour Augergne

Amurensis.

Michael Buchnor—Double Mauve.

Congo—Purple Red.

Abel Chatenay.

Any of the above, 2-3 feet, at 50c each.

Note—The above are grafted on Villosa roots and if any shoots start from below the graft they should be cut out.

Villosa Lilac—One of the most popular varieties with heavy leathery leaves, and large panicles of pale mauve pink flowers. This has always been one of the most expensive species, and the following prices are very low. Bushes 2-3 feet, each 35c. Per 100, \$20.00.

Miss Preston's Variety—Hybrid of Villosa, flowers single somewhat darker in color, and produced in large numbers. Excellent for specimens. 2-3 feet, each \$1.00.

MOUNTAIN ASH

This is one of the best ornamental trees and is especially at home as a lawn specimen. They should be grown in bush form. The trees we offer were grown from seed collected high in the Riding Mountains, and have proved absolutely hardy throughout the West. 2-3 feet, each 30c. 4-6 feet, each 50c.

PLUMS

The Native Plum is one of the best ornamental bushes there is, with its white blossoms in early summer, and it is always recommended as a beginning for any orchard. 4-6 feet, each 30c.

Wilson River—An improved variety of the wild plum, which is very hardy and reliable and produces superior fruit.

Tom Thumb Cherry—The hardest and best of the Sand Cherry hybrids. Fruit dark purple with red flesh. Each 50c.

Sioux Sand Cherry—Forms a very ornamental dwarf bush with dark shiny leaves and in early spring it is covered with scented white flowers. Each 50c.

Siberian Almond—Very similar to the above, but the flowers are bright pink. Each 50c.

SPIREA (Bridal Wreath)

Van Houttei—This dwarf flowering shrub has been immensely popular, but in some places it has not proved entirely hardy. Each 50c.

Media—Similar in appearance to Van Houttei, but later to flower and much hardier. Each 50c.

Pink Spirea—Flat heads of pink bloom. Each 50c.

PRUNUS TRILOBA

Very beautiful flowering shrubs. In early spring the bush is covered with exquisite double pink flowers resembling roses which are about 1 $\frac{1}{4}$ inches across. 3-4 feet, each 75c.

ROSES

The following are all shrubbery roses, which are hardy without protection.

Rubrifolia—Purple red foliage, small single pink flowers followed by many bright red fruits which remain on the bush until covered with snow. Each 50c.

Burnet—Dwarf, with many double cream blooms during June which are very sweetly scented. Each 75c.

Persian Yellow—The old hardy yellow which is becoming more popular each year. Each 75c.

For Rose Borers Use "Pysect"

DWARF PINE (*Pinus Montana Mugho*)

Valuable for foundation or landscape work, forming compact bushy plants about three feet high. Transplanted seedlings, 4-6 inches, each 20c.

Native White Spruce—Nursery grown specimens, about 1 foot high. Each 25c.

Carnduff, Sask.,
July 17, 1931.

Hine Brothers Nursery,
Brandon, Man.

Dear Sir:

We received these Petunia plants in good condition, and planted them on a Saturday evening. On Monday night following we had that very hard frost with varying frosts the next two nights. However I do not think we lost a plant One of the blooms we had before the hail was the largest Petunia bloom I ever saw and caused many favorable comments. . . .

Yours truly,

J. S. A.

GARDEN ORNAMENTS

Artistic and enduring, these will add immeasurably to the attraction of any home. Made from specially prepared concrete, colored to meet individual specifications, in one or more colors, which will not wash out or fade. Proper provision is made for drainage.

Hine Bros.,
Brandon, Man.

Dear Sir:

Some time ago I wrote you and told you two of the climbers I got from you died.

You sent me back 70c in return for them. I still kept on watering them and now they are leafing out so I am returning the 70c for them.

I always think fairness is best in the long run.
